## PRODUCT DESCRIPTION

LED Backlit can be utilized in offices, conference rooms, libraries and other tasks areas where general illumination is desired. The white diffused lens optimizes output while diffusing LED diode image. LED Backlit Panels are available in field selectable color temperature ( $3000 \mathrm{~K}, 3500 \mathrm{~K}$ or 4000 K ) or a dedicated 5000 K .

## FEATURES

- Dedicated 5000 K CCT or Field Selectable Color Temperature (3000K, 3500K or 4000 K )
- 1' x $4^{\prime}, 2^{\prime} \times 2$ 2' or 2' $\times 4^{\prime}$ sizes
- Surface, pendant and hard ceiling recessed kits available
- 0-10V dimming down to 5\%
- Universal 120-347V input
- cULus listed for damp location

## SPECIFICATION

Construction: An array of LEDs are mounted on the back of aluminum frame. White opalescent diffused lens optimizes output while reducing LED diode image. The construction seals the conditioned air from the plenum or non-conditioned air, eliminates bugs or dirt getting to top of lens for savings on maintenance cost.

Lens: PMMA (Polymethyl methacrylate) lens is lightweight and shatter resistant. Additional screws are provided to keep luminaire tight and free of bugs and insects.

Clearance: "IC" Insulated ceiling housings are direct contact rated. Not to be used in direct contact with spray foam insulation.

Installation: Wiring compartment is on the back of panel and includes replaceable driver, which is accessible via a service door secured with two screws. Wiring compartment consists of three $1 / 2$ " knockouts for romex or flex wiring.
