## DIMENSIONS

## Important Reminder

－All parameters if NOT specially mentioned are measured at 120 V AC input，rated load and $+25^{\circ} \mathrm{C}$ of ambient temperature
－To extend the driver＇s lifespan，please reduce the loading at lower input voltage
－Loading should be 5\％－100\％

## Dimming Operation

－The Pulse－Width Modulation（PWM）of output voltage can be adjusted through input terminal of the AC phase line（L）by connecting a TRIAC dimmer
－Usually matching with leading edge／Forward Phase TRIAC Dimmers（can be customized as a driver only matching trailing edge／reverse phase TRIAC Dimmers if needed）
－Please try to use dimmers with power at least 2.5 times as the output power of the driver
－For Forward phase，magnetic low voltage and TRIAC dimmers
